About me

I am a fifth-year student of Computer Systems and Network Engineering. Throughout my academic career, I have cultivated a growing interest in various disciplines, among which web design and user experience/interface (UX/UI) stand out. My participation in educational and personal projects has contributed significantly to the development of specific skills in these areas.

My ability to assume responsibilities has been evident both in academic projects and in personal initiatives, where I have proven to be proactive and committed to established objectives.

My ability to work as a team and communicate has been strengthened through these collaborative experiences, allowing me to play an integral role in achieving common goals.

Professional background

None

Skills

UX/UI interface design

Front-end developer

Academic record

Computer systems and networks engineer - Gerardo Barrios University 2020 – present.

Commercial vocational technician accounting option – Baccalaureate 2017-2019

Academic projects

Innovation 3D: a web app developed with the aim of providing 3D printing services such as prototyping small and medium runs of parts with the function of a calculator made to shape your design as you like.

Local wonder SV: a web app developed for beauty salons where they can provide their products and services in an easy way where customers can see everything a salon offers.

Arca accessories: It is an online store with the aim of offering a wide variety of products. It specializes in items for cell phones, standing out in this area. Which provides an intuitive and simple shopping experience for all customers.
